SUMMARY

Full-stack software engineer building HR applications, onboarding APIs, and SQL integrations at Irvine Unified School District. Delivers features across databases, user interfaces, authorization, testing, and deployment, with prior quality engineering experience at Apple.

EXPERIENCE

Irvine Unified School District | July 2024 - Present

Information Services Analyst I: Programmer

- Build full-stack HR applications with C#, Blazor, EF Core, and SQL Server for employee search, evaluations, reporting, and leave management.
- Built the onboarding API for employee usernames and student network IDs, including collision handling and identity history.
- Redesigned site-scoped access controls and delivered evaluation-request workflows with audit history and automated regression coverage.
- Modernized SQL integrations and vendor exports; packaged certification reporting into a reusable .NET tool with Excel output.
- Automated build and IIS deployment with Azure DevOps, adding test gates to catch regressions before release.

Apple | January 2022 - July 2022

Quality Engineering Intern, Identity Services

- Optimized log-parsing scripts to reduce bug triage time by 50%; managed 9,000+ tickets during a six-month internship.
- Improved triage documentation for staff and incoming interns, and collaborated with development teams to route issues for resolution.

SELECTED INDEPENDENT PROJECTS

PollyFwog | C# / .NET 10 / CLI tooling | Alpha

Built a terminal app for coordinating coding assistants across planning and execution, with runtime adapters, optional Git worktree isolation, and session recovery.

KeebJournal | Swift / SwiftUI / SwiftData / Firebase | In development

Built a native iOS app for documenting mechanical keyboard builds, with authentication, community discovery, comments, likes, and audio recording and playback using Firebase storage.

TECHNICAL SKILLS

Languages: C#, SQL, TypeScript, Python, Swift, HTML/CSS.

Web and data: .NET, ASP.NET Core, Blazor, Entity Framework Core, React, REST APIs, SQL Server.

Delivery and testing: Azure DevOps, CI/CD, IIS, Git, Docker, xUnit, bUnit, Vitest.

Mobile: SwiftUI, SwiftData, Firebase.

EDUCATION

B.S. in Computer Science | California State University, Fullerton | December 2022
